

Medica 2017

11-2017 003

When **5000** exhibitors, **125.000** trade visitors, **130** nations on **120.000**sqm in **18** large exhibition halls come together, then it is Medica time, now the 40th year in a row.

The company medical bees was present for the third time with 6qm booth at the ACIG conjoint booth themed "small booth but many products". We were the contact persons for our corporate clients and have had many interesting discussions. Over the 4 days of the fair, Marius Buchta, Birgit Humm, Charlotte Kohlbecher and Jana Heiß took care of our customers.

In addition to the focus product power system this year we also displayed surgical instruments with a special focus on complete spine sets (MCC, BB, KC).

The novelty was the market feedback for a particularly atraumatic Hohmann elevator and the interest in PEEK / Carbon instruments. We will provide additional information soon.

**INNOVATIVE SOLUTIONS
BROUGHT TO THE POINT**
